DETAILED ACTION

The following is an examiner's statement of reasons for allowance: The prior art teaches the use of a camera connected to a computer wherein the computer system is capable of video conferencing with other remote computers. The prior art teaches the use of transferring low resolution video images from the camera to the host computer using an isochronous transfer mode. The prior art teaches that the camera can also transmit high resolution still images at the same time that the video images are being transferred using isochronous image transfer. The prior art teaches that the still images can be transferred using a bulk transfer method. However, the prior art and Fujiwara teaches that when the video conferencing system is in use the high resolution images are not transferred via bulk transfer but are instead transferred using isochronous transfer. Therefore, the prior art does not teach transferring the high resolution still images from the camera to the host computer using bulk transfer during a video conferencing application in which the host computer is transmitting video to a remote computer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
